ENA ORAL CARE

DB digital brush chlorhexidine

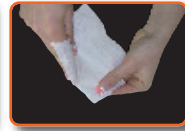

Disposable towel. Sanitizing & antiseptic with Chlorhexidine

Simply wrap the towel around your finger, run it on the tooth surface and on the gums, after every meal, when you are outdoors (as an alternative to the toothbrush), to remove food debris and bacteria, helping to prevent dental plaque.

- Antiseptic properties
- Essential when you can't brush your teeth:

- oral hygiene outdoors
- post-operative oral hygiene and in the presence of aphthae
- It removes pigmentation caused by food,

preserving the white of your teeth.

How to use the towel!
step by step: make a vertical movement, from gum to tooth, both on the upper and lower teeth. Repeat this movement also in the internal side of the mouth.

Life begins without bacteria in your mouth...
Learning to clean your teeth as a child helps to prevent caries, gingivitis infections and also to maintain good oral health for all your life.

Patented system. Sterilized with β -rays to avoid the use of preservatives.

- No contraindications
- Ideal for frequent use
- Recommended for babies
- Ideal for baby-teeth and gums
- Ideal for people with limited manual ability
- Ideal for caregivers

Disposable towel. Health and safe hygiene from birth in Saline.
Some characteristics of Digital Brush with Chlorhexidine but soaked

ECKM1 20 ml oral spray

Included into the **KISS ME KIT**

3E interdental brush

Interdental Brush

- Patented, anatomical, scalloped design, for optimal removal of plaque and food debris in interdental areas.
- Nylon bristles with retentive memory (it bends in order to follow the profile and returns to its original shape)
- Ergonomic plastic handle for an easy handling
- Hygienic cap
- Stainless steel Teflon coated wire, anti-scratch, ideal also around titanium implants
- The longer bristles bend over the shorter ones making its insertion easier.

Choose the size that best fits the space between your teeth. You can easily insert the brush if you tilt it from the bottom up in the lower jaw, and from the top down in the upper jaw. Several gentle, oblique movements are recommended at least 3 times, in order to remove plaque and food debris.
